

Community/family map: support level and interval scope are separate

Tiles show selected HPRCv2 arm/community support. Special rows report community-specific gene counts.

* Community contains at least one member arm without a called CHM13 PHR interval: C5 chr6_p; C7 chr13_p; C14 chrY_q; C15 chrY_p. Blank tiles mean no selected family/support row in the canonical HPRCv2 tab
