

# Ranked copy-aware candidate signals for review-zoom v5

Rows follow the upstream inventory rank; bar length is source/community arm support, not statistical significance.

PHR annotation copies   HPRCv2 arm/community support   Cross-community hub support   Community-specific genes   Mixed canonical gene support

Canonical HPRCv2 support tables and OR4F plot table. Fisher caveat: 116 family-community tests, 0 BH-significant; best q=0.071.
