

Whole-genome homolog-vs-interchrom winners (10:10)

Summary

PAN027 paternal hap2 query; marks show exact tract midpoint where best interchromosomal IMPG similarity beats best same-chromosome/homolog match

windows: 177,998

inter > same: 1,778

bp: 3.56 Mb

Color encodes winning target chromosome; gray marks acrocentric targets.

Query coordinate, Mb. Chromosome bar lengths are actual query chromosome lengths.
