

Nearest same-superpopulation neighbor in displayed MDS space

Boxplots plus jitter replace the long-tailed violins. Each point contributes one nearest other same-superpopulation D1-D2 distance.

Metric: nearest other point from the same continental superpopulation in displayed D1-D2 MDS space; self excluded.
No centroid, no all-pairwise summary. P-values: Kruskal-Wallis plus pairwise Wilcoxon, BH corrected; effect size: Cliff's delta.
