

Whole-genome 10:10 SweepGA/F32 IMPG class winners with donor ribbons

PAN028mat_vs_PAN027_joint: PAN028 mat query; ribbons mark high-confidence 2 kb runs where the best interchromosomal match beats the best same-chromosome match.

Drawn: 104 high-confidence runs, 2.07 Mb total; threshold: run ≥ 10 kb and mean interchrom identity ≥ 0.95 .

All coordinates are native whole-genome coordinates collapsed into length-scaled chromosome-order tracks.
