

PHR length distribution by chromosome end

Each row is one chromosome end, split into p-arm and q-arm panels. Color is the within-end share of called intervals in each 10 kb bin. The analysis searched/measured terminal 500 kb windows; values at/near the right edge are right-censored.

Source: all-vs-all.1Mb.p95.id95.len.tsv | 41/48 ends have called intervals; zero-signal ends: 2p, 3p, 5p, 8q, 11q, 14q, 18q | bin width = 10 kb
