

Whole-genome 10:10 SweepGA/F32 IMPG class winners with donor ribbons

PAN027 paternal child query; ribbons mark high-confidence 2 kb runs where the best interchromosomal match beats the best same-chromosome match.

Drawn: 52 high-confidence runs, 0.94 Mb total; threshold: run ≥ 10 kb and mean interchrom identity ≥ 0.95 .

All coordinates are native whole-genome coordinates collapsed into length-scaled chromosome-order tracks.
