

a WashU 3-generation T2T pedigree

Inter-chromosomal patches in odgi untangle (HQ filter); 92% (494/538) sit in a Leiden community

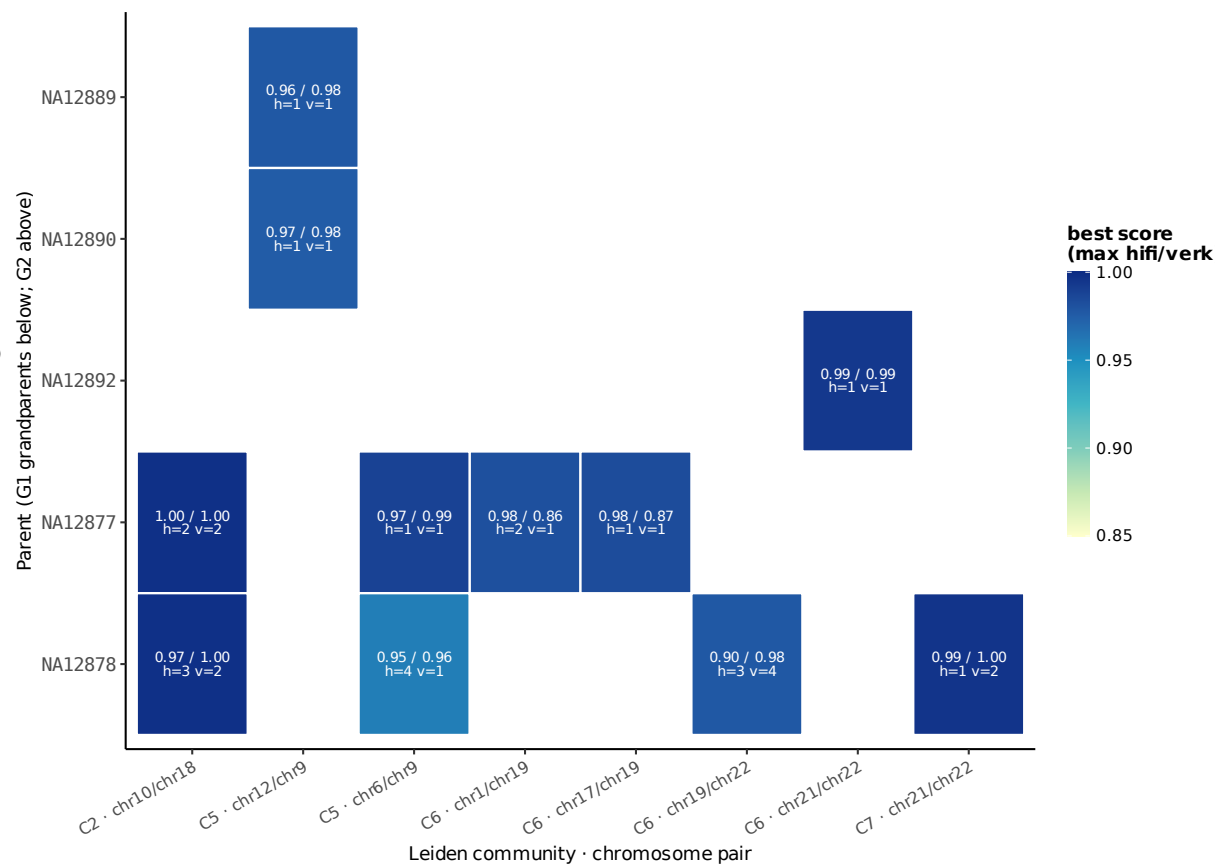

c RPE-1 t(X;10) rediscovery: sequence → 3D

Self-discovered Leiden community C2 = {chr10_q, chrX_q}; chrX_HAP1 carries chr10q material

b CEPH1463 cross-assembler-validated parent features (11)

Detected by hifiasm AND verkko in ≥1 child each, same Leiden community.
chr10/chr18 (C2, Linardopoulou) detected in NA12877 paternal and NA12878 maternal independently.

d Mouse zygote cross-species generalisation

B6 + CAST T2T; per-PHR-pair similarity vs Hi-C contact (Zuo et al. 2021)
