

# CHM13 PHR Hi-C contact-space MDS: 3D view

The same D1-D2-D3 contact-space MDS as the projection slide, rendered in a single oblique 3D. Colors match the sequence communities used throughout.

Bulk Hi-C contact-space MDS over CHM13 PHR/subtelomeric arm regions at 50 kb. This is a visual embedding of contact profiles, not a physical single-cell genome reconstruction.
