

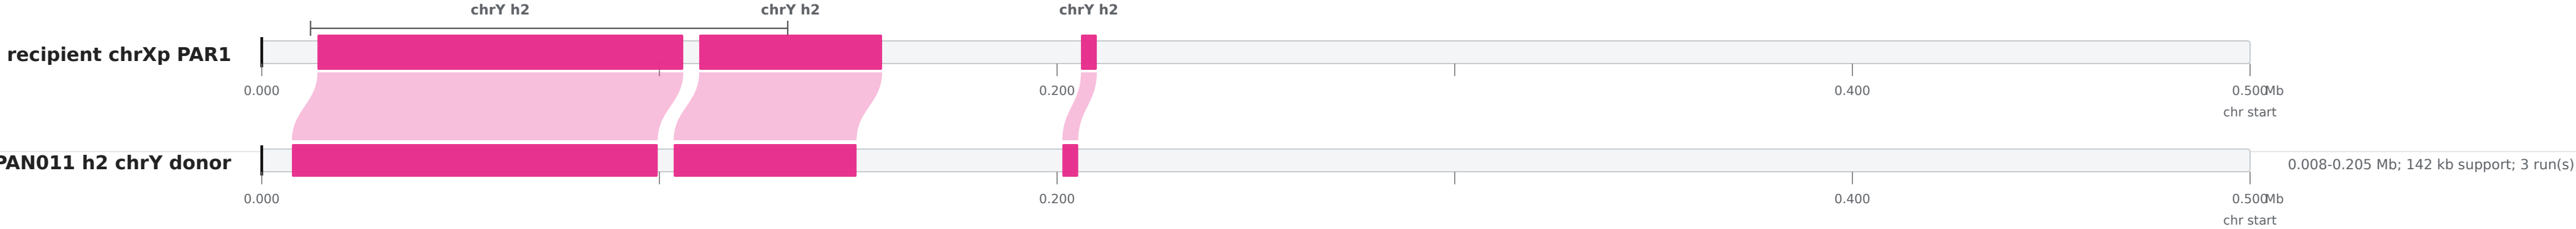

Fig5 donor-recipient ribbon draft: PAN027 paternal hap2 vs father PAN011

Recipient subtelomeric windows are PAN027#2; donor loci are PAN011 joint-haplotype intervals that win over the same-chromosome/homolog match.

Recipient color / ribbon target: ■ target chrY ■ target chr1 ■ target chr3 ■ other target, labeled

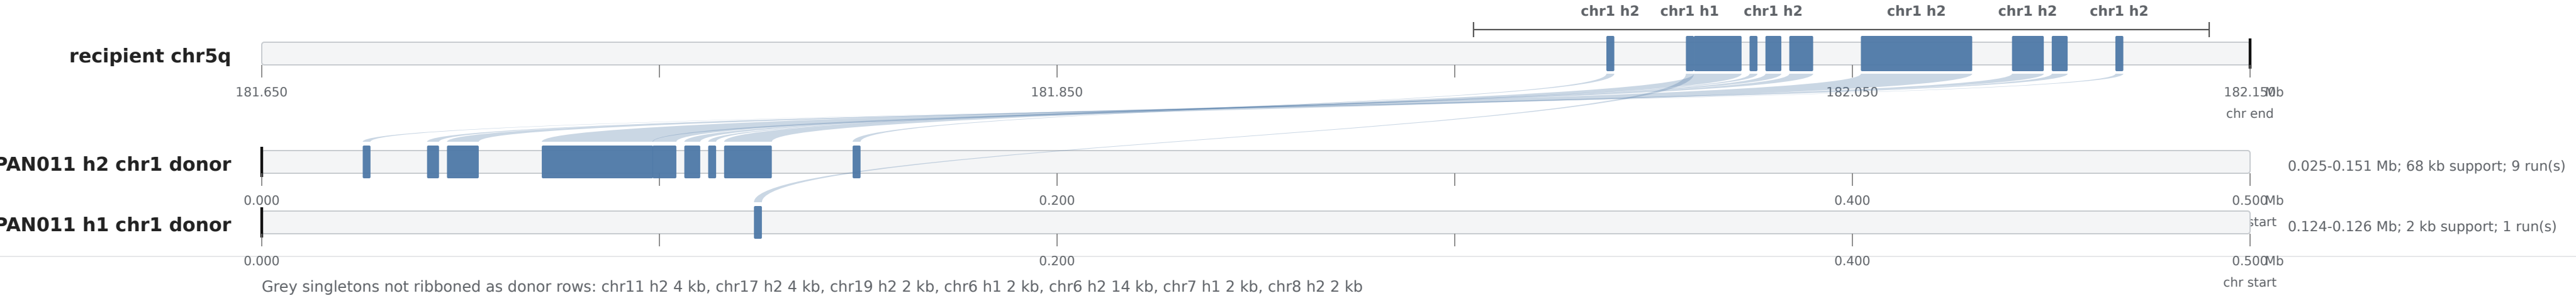

chrXp PAR1 recipient -> chrY donor

Ribbons use IMPG class-winning 2 kb windows; each donor row is one 500 kb PAN011 window containing one or more winning donor intervals.

chr5q recipient -> chr1-dominant donor set

Ribbons use IMPG class-winning 2 kb windows; each donor row is one 500 kb PAN011 window containing one or more winning donor intervals.

chr9q recipient -> chr3q-dominant donor set

Ribbons use IMPG class-winning 2 kb windows; each donor row is one 500 kb PAN011 window containing one or more winning donor intervals.
