

Fig5 prototype: strict-path syntenic/recombination schematic

Geometry comes from strict primary-path selected_segments.tsv rows; coordinates are native 500 kb assembly-window offsets, not CHM13 projections.

Flow legend PAR1 positive-control flow primary PHR donor flow side fragment low-confidence tail same-chromosome context

1. PAR1 positive control

PAN027 paternal hap2 <- PAN011 father
PAR 151 kb; same-chr 349 kb

source: chrX PAR1 context

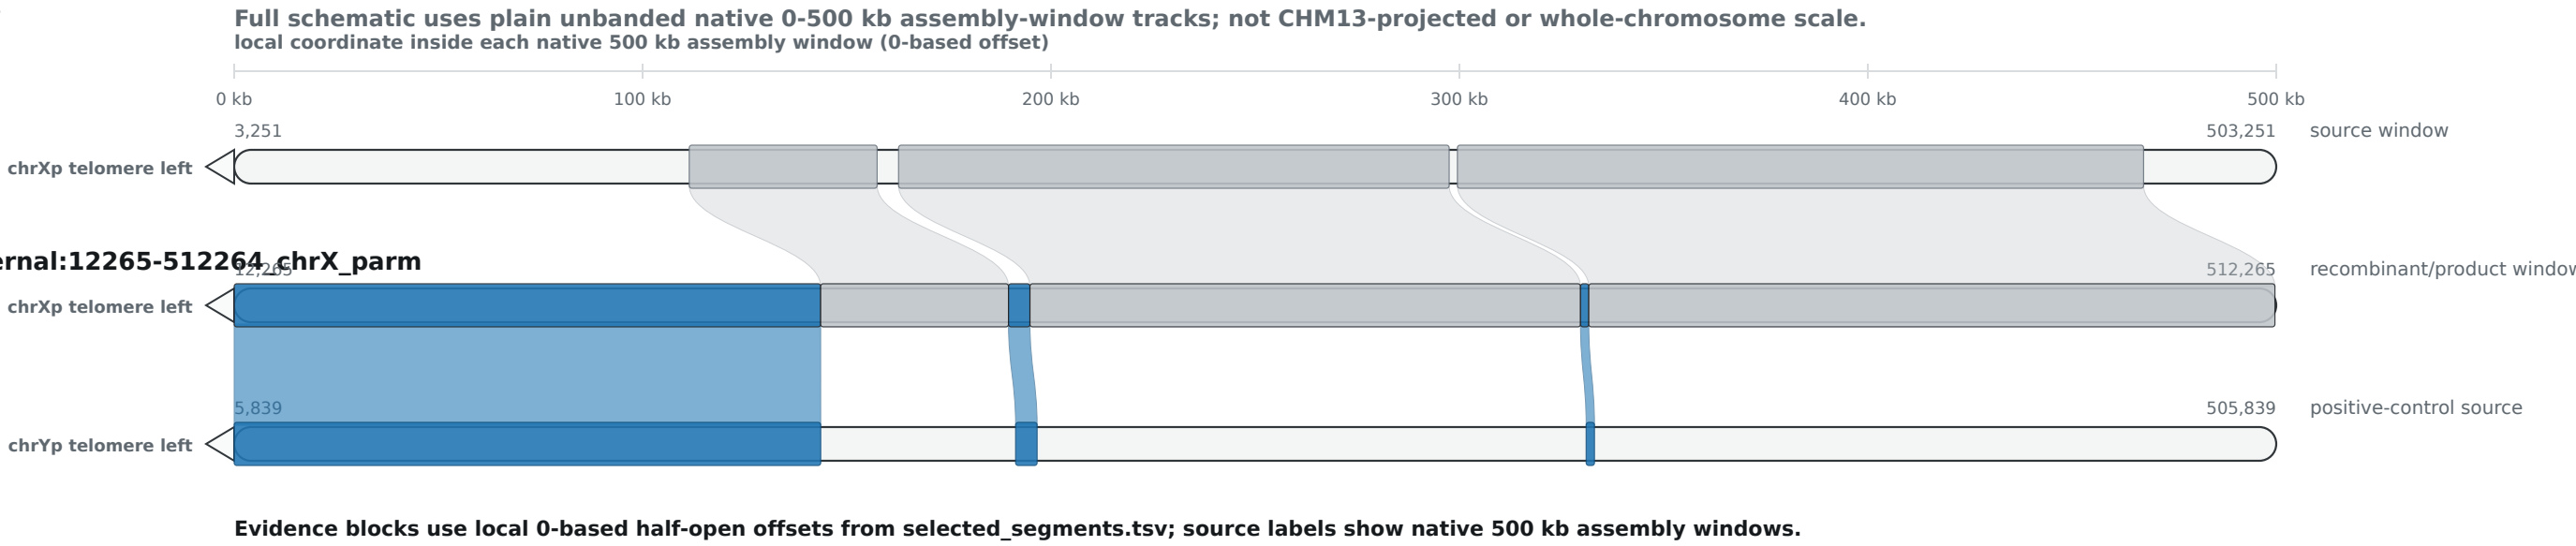

PAN011#1 chrX:3251-503251
